## What is MUJI?

### “NO LABEL. QUALITY GOODS”

MUJI is derived from its Japanese name ‘Mujirushi Ryohin’ which means ‘no label quality goods’. The brand launched in Japan in the 1980s with its no label, value-led, less is more concept.

MUJI is a renowned producer of stylish, functional and affordable quality goods that are relevant to all aspects of urban living, whether at work, rest or play.

Today MUJI has more than 800 stores worldwide and offers various consumer related products, including; household goods, stationery, travel accessories, beauty products and fashion.

In the Middle East, MUJI has stores in Kuwait, UAE, KSA, Bahrain, Qatar and Oman.

# MUJI Philosophy & Values

## Philosophy

- 1. Selection of materials:**  
We use many recycled materials, with an emphasis on quality. This enables us to create low-priced, high-quality products.
- 2. Streamlining processes:**  
Processes that have no bearing on a product's quality such as sorting, sizing, and polishing are eliminated. Focusing on true quality, MUJI's processes eliminate waste and reduce costs.
- 3. Simplification of packaging:**  
MUJI seeks to highlight products' natural colors and shapes. MUJI products appear in simple packaging bearing only product related information and a price tag.

## Values

- 1.** MUJI is not a brand whose value rests in the frills and "extras"
- 2.** MUJI is simplicity – but a simplicity achieved through a complexity of thought and design
- 3.** MUJI's streamlining is the result of careful elimination of gratuitous features and design unrelated to function
- 4.** MUJI, the brand, is rational, and free of agenda, doctrine, and "isms"
- 5.** MUJI aspires to modesty and plainness, to appeal to a wide group of people

## Essential oils

MUJI Essential Oils are pure and natural, from flowers and fruits harvested in areas they are famous for, such as Lavender from Provence, and Lemon or Blood Orange from Sicily Islands in Italy.

### What are essential oils?

Essential oils are the volatile molecules of a plant that most commonly provide it with fragrance, flavour and often therapeutic or aroma-therapeutic properties. They are extracted either through steam distillation of the leaves, wood and/or flowers, or cold expressed from the rind or peel.

The amount of oil extracted varies from plant to plant depending on the number of oil glands and method of extraction. For instance, it will take between 18 - 16 oranges to produce 10ml of essential oil; however, approximately 100kg of rose flowers will make 10ml of essential oil.

## Herb & Flower

## Blending Essential Oils

**Step 1:**  
Select an essential oil according to the benefit you would like to produce. Smell the oil, and if you like it then put it to one side.

**Step 2:**  
Look at the benefits related to the oils and select an oil that produces the benefit you are looking for.

**Step 3:**  
Hold the two selected oils in one hand and waft the scent towards your nose, if you like the general scent continue to Step 5, alternatively return to step 2 and select a different essential oil.

### Blending based on aroma

**Step 1:**  
Select an essential oil based on the aroma, i.e. smell the different oils and select the one you like.

**Step 2:**  
Select an oil and hold it in one hand alongside your original and waft the scent towards your nose, if you like the general odour continue to step 3.

**Step 4:**  
Once you have selected your oils, smell each individually and compare strengths. If one is a lot stronger than the other, use less drops. If they are both equally strong, use equal amounts. (Note: this is also subjective, you may prefer the fragrance of one oil over the other and decide that you would like to increase the strength of that oil by using more drops).

**Step 5:**  
Apply the blend according to the usage chart.

**Step 3:**  
Once you have selected your oils, smell each individually and compare strengths. If one is a lot stronger than the other use less drops. If they are both equally strong, use equal amounts. (Note: this is also subjective, you may prefer the fragrance of one oil over the other and decide that you would like to increase the strength of that oil by using more drops)

Muji fitted it with a small fan so that it needs just a few drops of oils, rather than water.

The Portable Aroma Diffuser comes with a black cushioned case accompanied with pockets inside to hold a charging cable and a 10-millilitre essential oil bottle.

## Skincare

**MUJI's Sensitive Skincare Series is derived from natural waters of Kamaishi caves in the Iwate Prefecture.**

The silky natural water pumped out from the cave is extremely soft, with almost the same pH level as human tears, hence it's able to soak rapidly into the skin.

Irritation on the skin is caused by many factors such as environment, stress and tiredness, so MUJI considers the importance of skincare that is gentle on the skin.

MUJI's sensitive skincare range is hypoallergenic, fragrance-free, Paraben free and Alcohol free, with no added colours or mineral oils. All skincare ranges contain natural flower and fruit extracts. This makes the skincare range suitable for everyone.
